

BR

Perimeter protection / Vehicle access

BARRIER

You prohibit vehicle transit in one direction.

The BR retractable spike barrier is a motorised barrier designed to control vehicle access to sensitive areas.

Upon authorisation by the access control system, the barrier lowers automatically and the integrated barrier (optional) rises to allow vehicles to enter the security zone.

Compact

Outdoor

Made in France

Features

BR 300 harrow

3 m passage width

BR 400 harrow

4 m passage

BR 500 harrow

5 m working width

BR 600 harrow

6 m working width

Height of tines

- Long tines: 200 mm
- Short tines: 130 mm

Tine thickness

10 mm

Power supply

230 VAC

Detailed description

Structure

- Motorisation compartment
- Powder-coated steel base box – Seafront
- Steel spikes fixed to the splined axle to facilitate tyre puncturing
- Rolling grid made of tear-drop pattern steel sheet

Equipment

- Programmable logic controller
- Manual disengagement of the harrow in the event of a power failure or malfunction of the harrow.
- For proper operation, the harrow must be positioned perpendicular to the road axis

Traffic flow

- 5 to 10 vehicles/min
- Caution: when lowered, vehicles must travel at a maximum speed of 10 km/h

Outdoor

Compact

Detection

Made in France

Contactless

Optional equipment

- Automatic barrier (recommended)
- Two-colour signal lights (recommended)
- Magnetic loops at entrance and exit (recommended)
- 2-position switch for fire safety
- Remote control panel with 3 buttons (up, down, emergency stop for the barrier)
- Additional control panel
- RAL colour of your choice
- ...

Work to be carried out by the customer

- Civil engineering works (trenches, ground repairs, etc.)
- Supply and installation of conduits and cable trays
- 230V power supply: 3x2.5mm²
- Access control and information cables
- ...
