# DPI

Access control / Electronic equipment

## Isolated Person Detector

You can monitor isolated persons and abandoned objects in technical or commercial spaces.

The isolated person detector is mounted vertically on the walls of most premises to be equipped.

Thanks to its quadruple detection system, the DPI continuously scans the area to be monitored and triggers an alarm if an immobile person is lying on the ground or an object is abandoned in the monitored area.

The DPI is ideal for banking spaces and commercial or industrial technical premises to prevent abnormal situations.

This device allows any doubts to be resolved by additional means (video, human intervention, etc.).

## Features

### Height

2,023 mm

### Position

150 mm from the ground

### Profile width

107 mm

### Profile thickness

80 mm

### Detector weight

12 kg

### Power supply

12 V 1 A

## Detailed description

### Structure

- Lacquered steel column
- White, RAL 9010 as standard
- Mounting: wall or plate
- Cable routing: Top and rear panel

### Equipment

- Triple motion detection in the area to be monitored
- Laser floor detection
- Programmable logic controller
- Alarm indicator light (configurable)
- Audible alarm (configurable)

### Behaviour analysis

- Analysis of moving objects
- Detection of objects and/or persons on the ground
- Analysis area +/- 25m<sup>2</sup>

Detection of isolated persons in critical situations
