

# Secure module

Security layout / Modular construction

You can quickly construct a secure building.

Secure modules are designed specifically for sensitive applications such as PCS, detention cells, police custody and bank branches. They can be constructed and fitted out quickly to meet the security requirements of the site in question.

Secure modules can be arranged on the ground floor or first floor.

The protective envelope is burglar-proof or bulletproof, depending on the desired level of security.

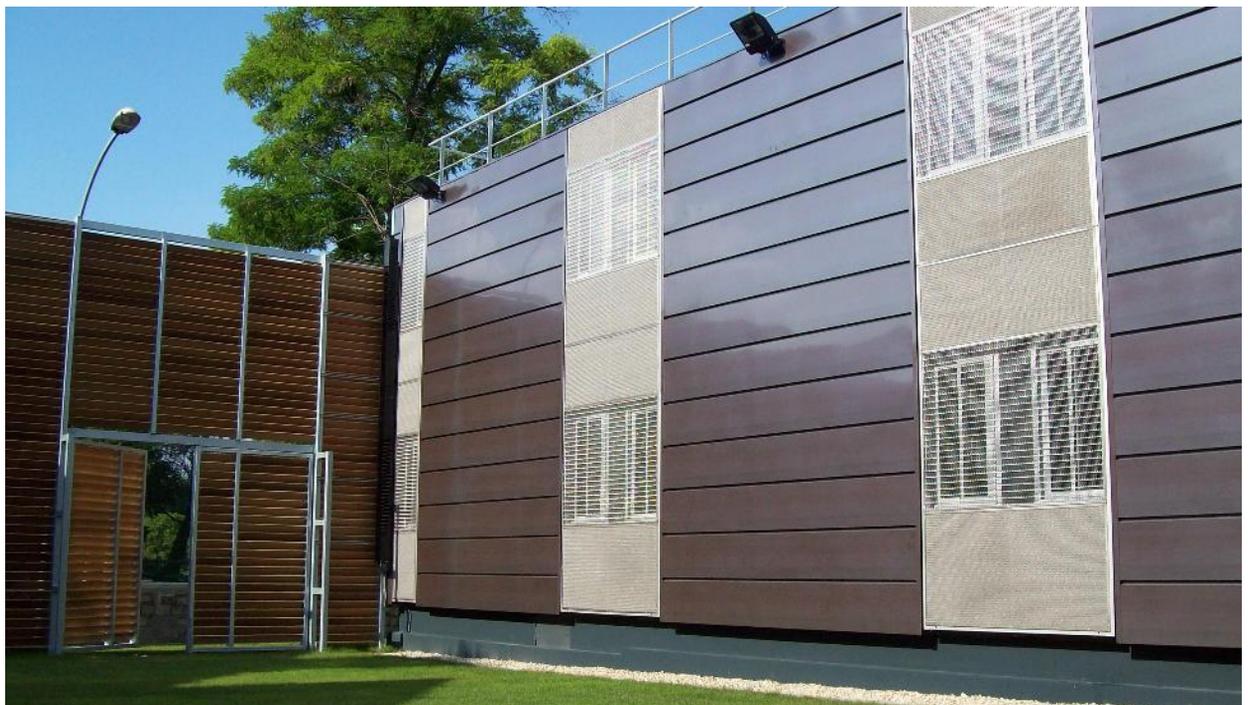

Burglar-proof

Bulletproof

Made in France

## Features

### Height

Adjustable / to be measured on site

### Width

Adjustable / to be raised on site

### Length

Adjustable / to be measured on site

## Detailed description

### Structure

Bulletproof treatment of walls, frames and glazing up to class FB7 / BR7
